Re: _____

I am writing to express my interest in working as a <Job or internship title> with <Organization Name>. I want to apply for this job as I believe that I have all the qualities and skills required for this position.

I am a XX year <Degree name> (International) student at <University Name>, majoring in <Subject Name>, and will graduate in <Month> <Year>.

My freelancing gigs in Australia allowed me to gain an excellent understanding of the Australian IT market. I have worked on various web projects that include WordPress website development, Landing pages, Search Engine Optimisation, Online Marketing, and Google analytics.

I am proficient in:

- Adobe Photoshop, Dreamweaver, Illustrator, Indesign
- Flash Animation and Modelling
- 3D Character Design, Level Design
- HTML & CSS

I worked as a <Graduate engineer> with <Organization Name> where I developed a **Central documentation system** for the department. The concept was highly appreciated by the Vice President of the company and was horizontally deployed in all other relevant departments of the company.

I designed my first website when I was 16 years old and failed multiple times before I succeeded in developing a successful online network in India. My passion for Business, the habit of learning from mistakes, and standing up again after every failure; helped me gain an insight into the complexities of the Business World and an experience that I could never have achieved in such a short period.

I did my Bachelors of Engineering from Aligarh Muslim University where I developed AMULIVE- [www.amulive.in] an online social network of AMU -- this was the first social network of any university in India and crossed 6000 members in the first 3 months of its launch.

Now as an elected Member of IT Board in Deakin University, I am working to improve career opportunities for students by introducing activities like HR Meets, Industry visits, Seminars by industry professionals, internships, etc.

I am a person who believes in challenging the status quo, and I like using my skills to develop web-based solutions for common problems in my vicinity. I am confident if I get a chance to work with your organization I would be able to contribute a lot and bring positive changes to your organization.

I will be highly pleased to get an opportunity to work with your organization and will leave no stone unturned to prove myself as a potential employee. I can be contacted at:
